Harry Kantsperger

Leitung Versicherungsreferat, Bayerischer Rundfunk

After his university entrance diploma Harry G. Kantsperger started his career as an account manager at two international Brokers. After that he switched to an insurer and worked as an underwriter property. For the last seven years he is accountable for the whole insurance program of Bayerischer Rundfunk which is a part of ARD/German Television. He is also part of the board at DVS (Deutscher Versicherungs-Schutzverband e.V.) and organiser and moderator of the 'Referententreffen' which is a group of about 40 Risk Managers.

Brian Kirwan

Head of Market Management, Allianz Global Corporate & Specialty

Brian was appointed the Head of Market Management, Allianz Global Corporate & Specialty Regional Unit London, in February 2011. Prior to this appointment he was the President of Allianz Risk Transfer (U.K.) Limited. Brian was responsible for the Insurance linked Markets Business of Allianz Risk Transfer Group ('ART') and a member of ART's Underwriting Committee and the ART Group Management Team.

Brian has over 17 year's experience in the international Alternative Risk Transfer market. Brian worked for 11 years at the Centre Solutions in London, Australia, Bermuda and New York in the Alternative Asset businesses.

Brian is an MBS (Finance) from the Smurfit Business School in Ireland, a bachelor of Commerce and a Chartered Professional Casualty Underwriter.

Joshua Klein

Author & Hacker Extraordinaire

Joshua Klein is a fervent hacker of all things – he will hack anything that moves. His list includes "social systems, computer networks, institutions, consumer hardware and animal behavior." His latest project, though charmingly low-tech, has amazing implications for the human-animal interface. Right now, he is working at Frog Design as a Principal Technologist, while developing mobile / social applications, health care-related systems and other tools that improve people's lives. When he's not taking things apart or putting them back together again he speaks, writes, and consults on new and emerging technologies that improve people's lives - and has tremendous fun doing it.
